Job Description:

We are looking for an experienced Mobile Developer (React-Native) for the development and maintenance of applications aimed at a range of mobile devices. The ideal candidate must have hands-on knowledge of the latest technologies used for mobile apps development and must have worked in any software development organization with minimum 4 years of experience.

Responsibilities:

- Design, execute and maintain advanced applications for the mobile apps platform using React-Native.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Identify and correct bottlenecks and fix bugs.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.

Required Qualification/skills:

- BS/MS Degree in Computer Science, Software Engineering or Related field.
- Minimum 4 year(s) hands on experience of overall mobile development.
- Minimum 1-2 years working experience on React-Native mobile development is must.
- A broad knowledge of React and the Javascript ecosystem.
- Experience with Native App development for Android and/or iOS.
- Experience with Multi-Threading and memory management specific to mobile devices.
- Must have published at least one consumer application on Android/Apple App Store.
- Experience working with Ios/Android frameworks such as Core Data, Core Animation, Core Graphics and Core Text.
- Proficient with Objective-C / Xcode, SWIFT and thorough understanding of all facets of programming.
- Understanding of Apple's/Android's design principles and interface guidelines.
- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies.
- Good understanding of the full mobile development life cycle.
- Excellent communication skills, fluency in English is essential.
- Ability to handle a diverse workload.

Required Skills:

objective-c, swift and thorough understanding of all facets of programming.
